## **ISCCM10 | POSTER LIST**

---

POSTER #	ABSTRACT TITLE	PRESENTER
#1	Exploring the regional factors of attitudes toward cultured meat	Aiko Hibino
#2	Cost-efficient, edible, and dissolvable microcarriers to cultivate primary cells in serum-free media	Alexandre Morel
#3	Optimising Microcarriers for Scalable Cultivated Meat Production	Alice Johnson
#4	Environmental impacts of cultivated meat production in a circular cell culture system	Anisiya Pavlova
#5	Spontaneous immortalisation and characterisation of bovine adipocytes	Apeksha Bharatgiri Goswami
#6	Creating fat for cultivated meat: quantity without compromising quality	Arash Shahbazpoor shahbazi
#7	Recent Developments in the Jewish Religious Perspective on Cultivated Meat	Ari Zivotofsky
#8	Development of anisotropic fibers by simultaneous spinning of cells and collagen using phase separation	Asuka Kato
#9	Calf serum from slaughterhouses can substitute fetal bovine serum	Aysenaz Tavsanli
#10	Regulatory requirements for cultivated meat: Quantification of human cMYC in livestock derived induced pluripotent stem cells (iPSCs)	Balint Szeder
#11	Automated electro-mechanical bioreactor for enhancing the maturation of engineered muscle tissues in vitro – A promising avenue for cultivated meat?	Beatrice Masante
#12	Platform Process Design of Cultivated Meat and Dairy Products: a PhD project outline	Ben Tumulero
#13	Culturing Porcine iPSCs in Perfusion Systems: A Collaboration Between Roslin Technologies and Extracellular	Caitlin Connolly
#14	Why is Wagyu special? : A comprehensive analysis of the elements of Wagyu beef relative to other beef for the design of cultured Wagyu beef.	Chika Nakadozono
#15	Pulsed-Electromagnetic Field Stimulation and Mechanical Stimulation for Enhancing Bovine Myoblast Myogenesis	Chloë Deelkens
#16	Establishing an industrializable cell system for cultivated chicken biomass	Claude Rescan
#17	Accelerating Myotube Fusion & Maturation for Cultured Meat	Corinne Smith
#18	Establishing robust porcine cell lines and in vitro cellular models to support cultivated meat production	Danai Georgiadou
#19	Structural characterisation of Caf1 protein polymers	Daniel Myatt
#20	Scalable Spinning of Hydrogel Fibers for Structured Cultured Meat Production	Rahman Omidinia
#21	PROFUSE-B8: A Spontaneously Immortalized Bovine Myoblast Cell Line for Cultivated Meat Production	Tamar Eigler
#22	Computer vision modelling for screening and characterisation of fat-producing cells in cellular agriculture	Ekaterini D. Zacharis
#23	Elucidating Mechanisms of Suspension Adaptation in Chicken Embryonic Fibroblasts	Elizabeth Contreras
#24	The Impact of Cell Differentiation on Sensory Qualities of Cultivated Pork Fat	Emily Lew
#25	Crusting-fabricated three-dimensional soy-based scaffolds for cultured meat production: A preliminary study	Ermie B. Mariano Jr.
#26	NAVIGATING CHALLENGES TOWARD DEVELOPING FRONTIER SPECIES CELL LINES	Gaston Otarola-Pezzani
#27	Design of experiments for media development	Guus Koorevaar
#28	Preliminary Findings on the Production of Active hTGFβ3 in Food-Grade Enzyme Strains for Cultured Meat Applications	Hirotaaka Matsubara
#29	Genetic engineering strategies to control lactate and ammonia production	Hooman Hefzi
#30	Microbial Lysates as a Substitute for Serum in Cultivated Meat Production	James Dolgin
#31	Bottlenecks and Opportunities in Cultivated Meat Production	Joana Carvalho Pereira
#32	Wageningen University Launches First European Master's Program in Cultivated Meat and Seafood	João Pedro Garcia
#33	In vivo assembly of DNA fragments for faster and lower-cost engineering of cultivated meat cells	John Se Kit Yuen Jr
#34	Engineering of new and improved phenotypes for cultivated meat cell lines	Joshua Flack
#35	Bovine Skeletal Muscle Tissue Formation with Mechanical Stimulation and Perfusion	Jung-Chun Sun
#36	Data-driven cell culture media optimization for cultured meat	Kenichi Toyoda
#37	Life Cycle Assessment of Commercial-Scale Cultivated Chicken Production Utilizing Cellular Fluxomics and Process Simulation	Kirsten Trinidad
#38	Innovative Approaches to Dairy Sustainability: Assessing the Life Cycle Impact of Cell-Cultivated Milk	Krista Anna Belajevskova
#39	Development of a Robust, Traceable Atlantic Salmon Cell Line for Sustainable Cellular Aquaculture.	Kyle Andrew Naylor
#40	The use of agricultural waste streams as feedstocks for cultivated meat	Lucy Wilkinson
#41	Cost-effective and food grade production of recombinant Fibroblast Growth Factor 2 for cultivated meat	Maaïke Appeldoorn
#42	Tailoring Taste: How Growth Conditions Shape Sensory and Nutritional Profiles in Cultured Quail and Beyond	Madison Ainsworth
#43	Composite Fats: Cellular Agriculture Meets Plant-Protein Scaffolds. Harnessing Cellular Agriculture and Plant-Protein Scaffolds to Create Composite Fats with Enhanced Sensory and Nutritional Attributes	Maria Abysova
#44	Cultivated meat: safety and quality characterisation during production scale-up	Maria Lazari
#45	High density co-differentiation of muscle and fat cells using hollow fiber bioreactor technology to obtain structurally mature tissue.	Maricke Angenent
#46	Scaling up fibroblast expansion for lab-grown animal-free leather production.	Mick Eikelhof
#47	Peptides derived from food by-products is promising for use in a simple and effective tailor-made serum-free media for bovine skeletal muscle cell culture	Mona Elisabeth Pedersen
#48	Developing optimised media formulations using High-Throughput Methodologies	Mozes Pajer
#49	Comparative study of meat flavor derived from cultured muscle and cultured fat of bovine	Natsu Takahashi
#50	Life Cycle Assessment of Serum-free, Food-grade, and Complex Culture Medium Production for Cultivated Meat.	Natsufumi Takenaka
#51	The Steaks are High but Inertia Rules: How Cognitive Dissonance Promotes Agricultural Sector's Resistance to Cultured Meat/Fish	Nick Lin-Hi
#52	Capacity of fish cell lines for suspension culture in the production of cultivated seafood	Nina Bornemann
#53	Formulating serum free media for proliferation of Rainbow trout cell lines in suspension	Nirai Govindasamy
#54	Metabolic Optimization of Manduca sexta Non-Adherent Cells for Cultivated Meat Applications	Olivia Calkins

#55	Serum-Free Isolation of Adipose-Derived Stem Cells from Atlantic Salmon	Patrícia Lopes
#56	Novel fit-for-purpose edible microcarriers for production of cultivated meat	Petra Hanga
#57	Using Computational Fluid Dynamics to optimize large-scale cultivated meat production.	Pieter Brorens
#58	The Imperative for Robust Porcine Stem Cell Banks for Cultivated Meat Applications	Pritika Singh
#59	Development of serum-free media formulations using media component screening platform	Quek Jun Ping
#60	Enhancing Cell Attachment on Plant-Based Scaffolds via Surface biofunctionalisation for Cultivated Meat Application	Ratima Suntornnond
#61	Artificial intelligence and machine learning applications for cultured meat	Rikard Saqe, Kevin Shen
#62	Animal Cell Culture Using Extract from Cyanobacteria via Solid Acid Catalysis for Sustainable Cultured Meat Production	Riko Suzuki
#63	bFGF alternatives peptides, novel cost-saving solutions for livestock cell culture	Ryota Haba
#64	Development of a 3-dimensional suspension culture system of bovine myogenic cells using Chlorella vulgaris-derived nutrient media	Ryu-ichiro Tanaka
#65	Comparison of Naturbeads and commercial microcarriers using primary and immortalized myoblasts for cultured meat applications	Sandra García Benlloch
#66	A Study on the Application of Various Methods for Sorting of Myosatellite Cells from Hanwoo(Korean Native Cattle) Muscle	Sanghun Park
#67	Revolutionizing agriculture: bovine stem cells in cultivated meat production	Shadi Tawil
#68	Symbiotic culture system using L-lactate-assimilating cyanobacteria for sustainable serum alternatives production	Shanga CHU
#69	Application of methylated $\beta$ -cyclodextrin in the production of cultivated fat cells	Simon Heine
#70	Genome-wide CRISPR screening platforms for cultivated meat cell lines	Stephan Alfaro
#71	High-throughput Label-free Imaging for the Continuous Quantification of Satellite Cell Proliferation and Myogenic Differentiation	Stig Skrivergaard
#72	Identification of novel pre-adipocyte markers through comparative analysis of porcine adipose tissue-derived clonal populations	Thomas Thrower
#73	The Role of Conditioned Media from Bovine Fat Progenitor Cells on Muscle Cell Proliferation and Differentiation	Tobias Baldeweg
#74	Metabolomic Analysis to Inform Serum-Free Medium Formulation and Bioprocess Design	Tom Davies
#75	Utilization of Anabaena sp. extracts for bioactive substances	Tsukasa Hara
#76	Porcine cultivated fat production by differentiation of immortalised preadipocytes	Vitor Espirito Santo
#77	Forming Business Ecosystem of Cultured Meat Industry in Japan and its Development	Waka Tajima
#78	Effect of Insect-derived Media Additives on Skeletal Muscle Cell Differentiation for Cultivated Meat Production	Yeong Woo Choi
#79	In-depth characterisation of media formulations with agricultural side streams for cost-effective and safety of cultivated meat production	Yin Ying Ho
#80	Potential application of plasma-functionalized liquid for tissue decontamination	Yuanyuan Pan
#81	Optimising Food-Grade Media for Cultivated Meat: A Collaborative Approach to Sustainable and Cost-Effective Stem Cell Cultivation	Zi Ying Tan
#82	Fabrication of novel nanofibrous scaffolds by electrospinning for cultivated meat production	Kamil Can Akcali
#83	Effects of BIFTEK supplement on the growth of bovine muscle satellite cells	Kamil Can Akcali
#84	Alternative protein sources as substitute to FBS in the culturing of 2D and 3D C2C12 models.	Davide Lanzoni
#85	Engineering adipose tissue using edible microcarriers with tunable physical properties for cultured meat applications	Stephanie Kawecki
#86	Fostering European Cellular Agriculture for Sustainable Transition Solutions (FEASTS)	Nike Schiavo
